IMPORTANT SAFETY INSTRUCTIONS

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean only with dry cloth.
7. Do not block any ventilation openings.
8. Install in accordance with the manufacturer's instructions.
9. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
10. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
11. Only use attachments/accessories specified by the manufacturer.
12. Unplug this apparatus during lightning storms or when unused for long periods of time.
13. Refer all servicing to qualified service personnel.
14. Batteries shall not be exposed to excessive heat such as sunshine, fire or the like.

A NOTE ABOUT RECYCLING:
This product’s packaging materials are recyclable and can be reused. Please dispose of any materials in accordance with the local recycling regulations. When discarding the unit, comply with local rules or regulations. Batteries should never be thrown away or incinerated but disposed of in accordance with the local regulations concerning battery disposal. This product and the supplied accessories, excluding the batteries, constitute the applicable product according to the WEEE directive.
NOTES ON USE

WARNINGS

- Avoid high temperatures.
- Allow for sufficient heat dispersion when installed in a rack.
- Handle the power cord carefully.
  Hold the plug when unplugging the cord.
- Keep the unit free from moisture, water, and dust.
- Unplug the power cord when not using the unit for long periods of time.
- Do not obstruct the ventilation holes.
- Do not let foreign objects into the unit.
- Do not let insecticides, benzene, and thinner come in contact with the unit.
- Never disassemble or modify the unit in any way.
- Ventilation should not be impeded by covering the ventilation openings with items, such as newspapers, tablecloths, or curtains.
- Naked flame sources such as lighted candles should not be placed on the unit.
- Observe and follow local regulations regarding battery disposal.
- Do not place objects filled with liquids, such as vases, on the unit.
- Do not handle the mains cord with wet hands.
- When the switch is in the OFF (STANDBY) position, the equipment is not completely switched off from MAINS.
- The equipment shall be installed near the power supply so that the power supply is easily accessible.
- Do not keep the battery in a place exposed to direct sunlight or in places with extremely high temperatures, such as near a heater.

CAUTIONS ON INSTALLATION

- For proper heat dispersal, do not install this unit in a confined space, such as a bookcase or similar enclosure.
  - More than 0.1 m is recommended.
Getting started

Thank you for purchasing this Marantz product. To ensure proper operation, please read these owner’s manual carefully before using the product. After reading this manual, be sure to keep it for future reference.

### Main features

**Playback of DSD file**  
This unit can play the DSD file via USB Type B.

**Toroidal transformer**  
This unit features a toroidal transformer that produces less vibration and magnetic leakage flux compared to conventional power transformers. The materials and manufacturing process of the ring-shaped core are strictly controlled to reduce vibration, while the short-ring attached to the perimeter of the transformer reduce magnetic leakage flux.

**Large-capacitance block capacitor**  
A large capacitance 4700 μF capacitor carefully selected for its acoustic characteristics is incorporated into the Audio power supply circuit.

**Audiophile-grade film capacitors and electrolytic capacitors**  
The unit’s features the same audiophile-grade film capacitors and electrolytic capacitors specifically used in top-range models.

**Low-noise low-distortion filter circuit and highspeed HDAMSA2-type output amplifier with the differential input type HDAM**

**Double-layered chassis**

<table>
<thead>
<tr>
<th>High-grade machined analog audio output connectors</th>
</tr>
</thead>
<tbody>
<tr>
<td>Can be used as a D/A convertor</td>
</tr>
<tr>
<td>Digital audio signals input from an external device or computer into this unit can be converted and output as analog signals using this unit’s D/A converter.</td>
</tr>
</tbody>
</table>

**Inverted-phase analog output signal is possible**  
The USA system balanced output signal of this unit can be inverted to permit a balanced input to a European type amplifier.

**Peripheral circuitry off function minimizes audio output signal interference**  
In order to minimize noise from peripheral circuitry which could interfere with the analog audio signal, this unit is equipped with a peripheral circuitry off function which turns off the digital output circuit, the display, and the illumination lamp.

**Filter switching function**  
Switching between 2 types of filter characteristics is possible during playback in the DSD file and PCM file, allowing the listener to enjoy different shadings of the music.

**Supports Internet Radio and music streaming**  
Supports AirPlay® (page 34)

**DLNA ver. 1.5 support for audio networks**

**Supports online music, including Last.fm, Spotify**

**Support for High Quality Audio playback WAV/FLAC/ALAC (Apple Lossless Audio Codec)**

**Support for Gapless playback**  
Playback with no gap between music files (for WAV/FLAC only)

**iPod auto detect charges your device even after this unit switches to standby mode**

**“Marantz Remote App” compatibility for performing basic unit operations with an iPad®, iPhone or Android smartphone**

**OLED (Organic Light Emitting Diode) display that can display 3 lines**  
Auto Standby mode for energy savings
Cautions on handling

- **Before turning the power switch on**
  Check once again that all connections are correct and that there are no problems with the connection cables.

- **Power is supplied to some of the circuitry even when the unit is set to the standby mode.** When going on vacation or leaving home for long periods of time, be sure to unplug the power cord from the power outlet.

- **About condensation**
  If there is a major difference in temperature between the inside of the unit and its surroundings, condensation may form on parts inside the unit, causing it to fail to operate properly.
  If this happens, let the unit sit for an hour or two with the power turned off and wait until there is little difference in temperature before using the unit.

- **Cautions on using smartphones**
  Using a smartphone near this unit may result in noise. If that occurs, move the smartphone away from the unit when it is in use.

- **Moving the unit**
  Turn off the power and unplug the power cord from the power outlet. Next, disconnect the cables connected to other system units before moving the unit.

About the remote control

**Inserting the batteries**

1. Remove the rear cover of the remote control.
2. Set two R03/AAA batteries in the battery compartment in the indicated direction.
3. Put the rear cover back on.

**NOTE**

- Insert the specified batteries in the remote control.
- Replace the batteries with new ones if the set does not operate even when the remote control is operated close to the unit. (The supplied batteries are only for verifying operation. Replace them with new batteries at an early date.)
- When inserting the batteries, be sure to do so in the proper direction, following the ♂ and ♀ marks in the battery compartment.
- To prevent damage or leakage of battery fluid:
  - Do not use a new battery together with an old one.
  - Do not use two different types of batteries.
  - Do not attempt to charge dry batteries.
  - Do not short-circuit, disassemble, heat or dispose of batteries in flames.
  - Do not keep the battery in a place exposed to direct sunlight or in places with extremely high temperatures, such as near a heater.
  - If the battery fluid should leak, carefully wipe the fluid off the inside of the battery compartment and insert new batteries.
  - Remove the batteries from the remote control if it will not be in use for long periods.
  - Used batteries should be disposed of in accordance with the local regulations regarding battery disposal.
  - The remote control may function improperly if rechargeable batteries are used.
Operating range of the remote control

Point the remote control at the remote sensor when operating it.

Approx. 8 m

30° 30°

NOTE

- The set may function improperly or the remote control may not operate if the remote control sensor is exposed to direct sunlight, strong artificial light from an inverter type fluorescent lamp or infrared light.
- When using 3D video devices that transmit radio communication signals (such as infrared signals etc) between the various units (such as the monitor, 3D glasses, 3D transmitter unit etc), the remote control may not operate due to interference from those radio communication signals. If this occurs, adjust the direction and distance of the 3D communication for each unit, and check that the remote control operation is not affected by these signals.

Marantz Remote App

Marantz Remote App is a unique application developed for the iPhone, iPod touch and Android smartphone. This application enables you to control Marantz network devices that are connected to your home network. Install the App onto your iPhone, iPod touch or Android smartphone to control this device.

- Bidirectional communication is performed.
- The Marantz Remote App can be downloaded for free from the Apple App Store or Google Play store.
Preparation

Here, we explain the connections and basic operation methods for this unit.

- Connections  page 6
- Setup  page 11
Connections

NOTE
• Do not plug in the power cord until all connections have been completed.
• When making connections, also refer to the operating instructions of the other components.
• Be sure to connect the left and right channels properly (left with left, right with right).
• Do not bundle power cords together with connection cables. Doing so can result in humming or noise.
• Do not connect the unit to the PHONO input connectors on the amplifier.

Analog connections

UNBALANCED

BALANCED

- **BALANCED Jacks**
The BALANCED jacks on this unit are equipped with XLR connectors that are widely used on professional equipment. Their features are listed below.
- The 3 pin construction enables the musical signal to be transmitted as a balanced signal, with little effect from external noise.
- The detachable locking mechanism minimizes connector play and enhances connection reliability.

The XLR connector for professional use is internally wired in either of the following two systems. This unit employs the USA system.
- USA system ((Conv. PIN=COLD ③ PIN=HOT)

If a product that employs the European system is connected with this unit via a balanced cable, the reproduced signal may be phase-inverted.
To correct the inversion, set the “Phase” to “Inverted” at the menu setting (page 19).
Digital connections

When connecting, use a commercially available optical digital cable or coaxial digital cable.

Digital audio output

Connect digital devices such as AV receivers and D/A converters with the unit to enjoy digital audio output from the unit.

Digital audio input

If a device equipped with CD transport or digital audio output is connected to this unit, this unit can be used as a D/A converter (page 39 “Using as a D/A converter”).

Digital connections

When connecting, use a commercially available optical digital cable or coaxial digital cable.

NOTE
• Digital audio output is stopped during DSD signal playback.
• The digital audio output can be turned on/off in the “Digital Out” menu (page 19).

When connecting the optical digital output connector with an optical transmission cable (sold separately)

Match the shapes then insert firmly.

NOTE
• Linear PCM signals with a sampling frequency of 32 kHz, 44.1 kHz, 48 kHz, 64 kHz, 88.2 kHz, 96 kHz, 176.4 kHz, or 192 kHz can be input into this device.
• Do not input signals other than linear PCM signals, such as Dolby digital, DTS, AAC etc. into this device. Doing so may cause noise, which may cause damage to the speakers.

PC connection

By connecting a computer to the USB port on the rear panel of this unit using a commercially available USB cable, this unit can be used as a D/A converter (page 39 “Using as a D/A converter”).

NOTE
• Operation will not occur correctly if connected to the computer before the dedicated driver has been installed.
• Use a cable that is 3 m or less to connect to the computer.

Plug that fits the shape of the connection device connector

Type B

Type A

Computer installed with a media player
Connecting to a home network (LAN)

- This unit lets you play via your home network (LAN) music files stored on a computer and music content such as that from Internet radio. You can also operate this unit from a computer using the Web control function.
- You can update by downloading the latest firmware from the Marantz website. For more information, see "Update” (page 12).
- See “Setting the network [Network]” (page 15) for more information on network setting.

Required system

- **Broadband Internet connection**
  A device that connects to the broadband circuit and conducts communications on the Internet. A type that is integrated with a router is also available.

- **Modem**
  When using this unit, we recommend you use a router equipped with the following functions:
  - Built-in DHCP server
    This function automatically assigns IP addresses on the LAN.
  - Built-in 100BASE-TX switch
    When connecting multiple devices, we recommend a switching hub with a speed of 100 Mbps or greater.

- **LAN cable (CAT-5 or greater recommended)**
  - Use only a shielded STP or ScTP LAN cable which is available at retailer.
  - Some flat type LAN cables are easily affected by noise. We recommend using a normal type cable.

**NOTE**
- A contract with an ISP is required to connect to the Internet.
- No additional contract is needed if you already have a broadband connection to the Internet.
- The types of routers that can be used depend on the ISP. Contact an ISP or a computer shop for details.
- Marantz assumes no responsibility whatsoever for any communication errors or troubles resulting from customer’s network environment or connected devices.
- This unit is not compatible with PPPoE. A PPPoE-compatible router is required if you have a contract for a type of line set by PPPoE.
- Do not connect an Ethernet connector directly to the LAN port/ Ethernet connector on your computer.
- To listen to audio streaming, use a router that supports audio streaming.

Wired LAN

For connections to the Internet, contact an ISP (Internet Service Provider) or a computer shop.
Connecting other equipment

**RS-232C**
Connect an external control device or other device for servicing. (Use a straight cable for the connection.)

**FLASHER IN**
This unit can be controlled by connecting a control box or other control device to this unit.

- **Connection**
  Use the supplied remote connection cable to connect the REMOTE CONTROL IN terminal of this unit to REMOTE CONTROL OUT terminal of the amplifier.

- **Setting**
  Set the remote control switch on the rear panel of this unit to “EXT.” to use this feature.
  - This setting will disable remote sensor reception of this unit.
  - To operate the unit, point the remote control at the remote sensor of the amplifier.

To use this unit without connecting it to the amplifier, set the remote control switch to “INT.”.

Remote control jacks connection

If this unit is connected to a Marantz amp, the amp can be controlled via this unit using the Marantz Remote App or web control function (see page 37). Also, remote control signals received by the amp can be used to control this unit.

- **Connection**
  Use the supplied remote connection cable to connect the REMOTE CONTROL IN terminal of this unit to REMOTE CONTROL OUT terminal of the amplifier.

- **Setting**
  Set the remote control switch on the rear panel of this unit to “EXT.” to use this feature.
Connecting the power cord

When all of the connections are completed, insert the power plug into the power outlet.

![Diagram of power cord connection]

To household power outlet (AC 230 V, 50/60 Hz)

Power cord (supplied)

**NOTE**

- Insert the plugs securely. Loose connections will result in the generation of noise.
- Do not unplug the power cord while the unit is operating.
- Do not use a power cord other than the cord supplied with this unit.

### Menu operation

1. **Press MENU.**
   - Turns on the Menu settings mode and the Menu appears on the display (page 11 “Menu map”).

2. **Use △▼ and ENTER to select menu you want to change.**
   - To back to the top of the menu, during menu operation, press HOME.

* Displayed when the “DHCP” setting is “Off” (page 15).
Setting the first setup
[Quick Setup]
• For details on “Quick Setup” operations, see the separate “Getting Started”.
• If you cancelled “Quick Setup” menu or changed the network environment, perform “Menu” – “Quick Setup”.

General Settings [General]

Language
Sets the language for display the menu.
• The default setting is “English”.

1 Press MENU.
   Turns on the Menu settings mode and the Menu appears on the display (page 11 “Menu map”).

2 Use △▽ and ENTER to select “General” – “Language”, then press ENTER or ▶.

   English / Deutsch / Français / Italiano / Nederlands / Español / Svenska

Auto-Standby
When this unit is in the stop state and there is no input signal and operation for 30 minutes, it automatically enters the standby mode.
• The default setting is “On”.

   1 Press MENU.
      Turns on the Menu settings mode and the Menu appears on the display (page 11 “Menu map”).
   2 Use △▽ and ENTER to select “General” – “Auto-Standby”, then press ENTER or ▶.
      “Select Auto-Standby” menu appears.
   3 Use △▽ to select “On” or “Off”, then press ENTER or ▶.
      The setting is entered.

   NOTE
In the following situations, the Auto-Standby function does not operate.
• When the source is “iPod” (Direct mode) or “AirPlay”.

Firmware

Update
• In order to update the firmware, the environment and settings required for connecting to broadband internet are needed (page 8).
• Perform the firmware update operation after at least 2 minutes has elapsed since turning this unit’s power ON.

   1 Press MENU.
      Turns on the Menu settings mode and the Menu appears on the display (page 11 “Menu map”).
   2 Use △▽ and ENTER to select “General” – “Firmware” – “Update”, then press ENTER or ▶.

Check For Update
Check for firmware updates. You can also check approximately how long it will take to complete an update.

   Update Start
Execute the update process.
• If updating fails, the set automatically retries, but if updating is still not possible, one of the messages shown below is displayed. If the display reads as shown below, check the settings and network environment, then update again.

<table>
<thead>
<tr>
<th>Display</th>

<td>Downloading of the firmware has failed.</td>
</tr>
</tbody>
</table>
Update on web screen

Firmware can be updated using the “Web control function” (page 37). “Web control function” (page 37) settings must be completed in advance on a PC belonging to the same network. For information on obtaining update files, please contact our customer service center.

1. Click ④ from step 5 for the “Web control function” (page 37). The PC will display the following screen. Wait for approximately 1 minute. You can also gain access by entering the IP address shown by the unit into a web browser.

   ![Web display](image)

   **The web display**

   FIRMWARE
   Please wait for a moment...

   ![Unit's screen display](image)

   **The unit's screen display**

   Address: 192.168.xxx.xxx

2. When the following screen is displayed by the PC, click the “Choose File” (①) button, select the update file, and click the “Upload” (②) button.

3. When the following screen is displayed, click the “OK” (③) button. Updating will begin.

   ![Update screen](image)

   **FIRMWARE**
   Updating...
   Please wait for a while...

   ![Notification](image)

   **Notification**
   Displays a notification message on this unit’s menu screen when the latest firmware is released with “Update.” Connect to broadband Internet (page 8) when using this function.

   ![Update menu](image)

   **Update**
   Displays a notification message on this unit’s menu screen when the latest firmware is released with “Update.” Connect to broadband Internet (page 8) when using this function.

   ![Update settings](image)

   **Update settings**
   Turns on the Menu settings mode and the Menu appears on the display (page 11 “Menu map”).

   ![Update notification](image)

   **Update notification**
   “Update Notification” menu appears.

   Do not operate the unit while updating is in progress.

   ![Update completion](image)

   **Update completion**
   New Firmware: xxx.fw
   Firmware upload status: 100% completed.
   The upload process finished successfully. Please close this.

   ![Update settings](image)

   **Update settings**
   Button names may vary depending on the OS language used on your computer.

   ![Update options](image)

   **Update options**
   • When you press ENTER during display of the notification message, the “Check For Update” is displayed. (Refer to page 12 for more information on “Update”.)
   • Press < to erase the notification message.
**Upgrade**

Display a notification message on this unit’s menu screen when downloadable firmware is released with “Add New Feature”.
Connect to broadband Internet (page 8) when using this function.

1. Press **MENU**.
   | Turns on the Menu settings mode and the Menu appears on the display (page 11 “Menu map”).

2. Use ▲ ▼ and **ENTER** to select “General” – “Firmware” – “Notification” – “Upgrade”, then press **ENTER** or ▶.
   | “Upgrade Notification” menu appears.

3. Use ▲ ▼ to select “On”, then press **ENTER** or ▶.
   | • On | Display upgrade message.
   | • Off | Do not display upgrade message.

- When you press **ENTER** during display of the notification message, the “Add New Feature” is displayed. (Refer to page 14 for more information on “Add New Feature”.)
- Press ▼ to erase the notification message.

**Add New Feature**

- In order to add new functions, the environment and settings required for connecting to broadband internet are needed (page 8).
- Perform the add new feature operation after at least 2 minutes has elapsed since turning this unit’s power on.

1. Press **MENU**.
   | Turns on the Menu settings mode and the Menu appears on the display (page 11 “Menu map”).

2. Use ▲ ▼ to select “General” – “Firmware” – “Add New Feature”, then press **ENTER** or ▶.

   - **Upgrade Status**
     | Display a list of the additional functions provided by the upgrade.
   - **Upgrade Start**
     | Execute the upgrade process.
   - • If the upgrade is not successful, an error message identical to those in “Update” (page 12) will appear on the display. Check the settings and network environment, then update again.
   - **Upgrade ID**
     | The ID number shown on this screen is needed when carrying out the procedure.

3. See the Marantz website for details about updates.
When the procedure is complete, “Registered” is displayed and updates can be carried out. If the procedure has not been carried out, “Not Registered” is displayed.

[Notes concerning use of “Update” and “Add New Feature”]

- Do not turn off the power until updating or upgrading is completed.
- Even with a broadband connection to the Internet, approximately 20 minutes is required for the updating/upgrading procedure to be completed.
- Once updating/upgrading starts, normal operations on this unit cannot be performed until updating/upgrading is completed.
- Furthermore, updating/upgrading the firmware may reset the backup data for the parameters, etc. set for this unit.
- If the update or upgrade fails, remove and re-insert the power cord. “Update Retry” appears on the display and update restarts from the point at which update failed. If the error continues despite this, check the network environment.

- Information regarding the “Update” function and “Add New Feature” will be announced on the Marantz web site each time related plans are defined.
- When usable new firmware is released with “Update” or “Add New Feature”, a notification message is displayed on the menu screen. When you do not want to be notified, set “Update” (page 13) and “Upgrade” (page 14) to “Off”.

- Information regarding the “Update” function and “Add New Feature” will be announced on the Marantz website each time related plans are defined.
- When usable new firmware is released with “Update” or “Add New Feature”, a notification message is displayed on the menu screen. When you do not want to be notified, set “Update” (page 13) and “Upgrade” (page 14) to “Off”.

- Information regarding the “Update” function and “Add New Feature” will be announced on the Marantz website each time related plans are defined.
- When usable new firmware is released with “Update” or “Add New Feature”, a notification message is displayed on the menu screen. When you do not want to be notified, set “Update” (page 13) and “Upgrade” (page 14) to “Off”.
Setting the network [Network]

• For details on “Quick Setup” operations, see the separate “Getting Started”.
• If you cancelled “Quick Setup” menu or changed the network environment, perform “Menu” – “Quick Setup”.

Connecting wired LAN

Use this procedure to configure the wired LAN settings.

Network connecting (when “DHCP” settings are “On”)

When using this unit with the broadband router’s DHCP function enabled, this unit automatically performs the IP address setting and other settings.

1. Connect the LAN cable (page 8 “Connecting to a home network (LAN)” – “Wired LAN”).
2. Press ◎ (on/standby) to turn on power to the main unit.
3. Press MENU. Turns on the Menu settings mode and the Menu appears on the display (page 11 “Menu map”).

4. Use △ or ENTER to select “Network” – “Settings” – “DHCP (On)”, then press ENTER or ▶. “Select DHCP” menu appears.
5. Use △ to select “On”, then press ENTER or ▶. “Setup Ethernet” menu appears.
6. Use △ to select “Test Connection”, then press ENTER or ▶.

“Wait for the network to connect...” is displayed, and the unit starts connecting to the LAN.
• When the connection is made successfully, “Connected!” appears.
• If the connection cannot be established, “Connection Failed” is displayed. Perform steps 1 – 6 again.

You may need to set the network connection manually, depending on the provider you use. To set the connection manually, use the setting procedure of “Network connecting (when "DHCP" settings are "Off")”.

Network connecting (when “DHCP” settings is “Off”)

This section explains the settings when connecting this unit to a network that does not have a DHCP function.

To configure the settings manually, check the setting details with your network administrator.

1. Perform steps 1 – 4 of the “Network connecting (when “DHCP” settings are “On”)” procedure and select “Off” in step 5. “Setup Ethernet” menu appears.
2. Use △ or ENTER to select “IP Address”, then press ENTER or ▶. “Enter IP Address” menu appears.
3. Use △ or 0 – 9 to input the IP address and press ENTER.
4. Use △ or 0 – 9 to input the address for “Subnet Mask”, “Gateway”, “Primary DNS”, and “Secondary DNS”.
5. Use △ or ENTER to select “Test Connection”, then press ENTER or ▶.

“Wait for the network to connect...” is displayed, and the unit starts connecting to the LAN.
• When the connection is made successfully, “Connected!” appears.
• If the connection cannot be established, “Connection Failed” is displayed. Perform steps 1 – 5 again.
Proxy settings

Configure these settings to connect to the internet via a proxy server.

1. Press MENU. Turns on the Menu settings mode and the Menu appears on the display (page 11 "Menu map").

2. Use △ or ENTER to select “Network” – “Settings” – “Proxy”, then press ENTER or ▶.

3. If “Proxy(On)” appears, go to step 5.
   If “Proxy(Off)” appears, press ENTER or ▶.

4. Use △ to select “On”, then press ENTER or ▶.

5. Use △ or ENTER to select “Proxy (Address)” or “Proxy (Name)”, then press ENTER or ▶.

6. Use △ or ENTER to select “Address” or “Name”, then press ENTER or ▶.

7. Use △ or ENTER to select “Address” or “Name”, then press ENTER or ▶.

8. Use △ or 0-9, +10 to input the address or name, then press ENTER.

9. Use △ to select “Port”, then press ENTER or ▶.

10. Use △ or 0-9 to input the port, then press ENTER.

The Proxy settings are completed.
Other network settings

- **Network Control**
  Set the network function On/Off during standby.

  1. Press **MENU**. (Turns on the Menu settings mode and the Menu appears on the display (page 11, "Menu map").)

  2. Use \( \Delta \nabla \) to select “Network” – “Network Control”, then press **ENTER** or \( \triangleright \). ("Network Control" menu appears.)

  3. Use \( \Delta \nabla \) to select “On”, then press **ENTER** or \( \triangleright \).
     - **On**
       Network is on during standby. Main unit operable with a network compatible controller. Shortens the time before the network connection is completed.
       - When “Network Control” is set to “On”, the power display lights orange.
       - More power is consumed when in standby (Power consumption: 3 W).

     - **Off**
       Suspend network function during standby. It will take slightly longer till the network connection is completed.
       - The minimum amount of power is consumed when in standby (Power consumption: 0.3 W).
       - This is the default setting.

  4. Press **MENU**. (The display returns to normal.)

- **Friendly Name**
  The Friendly Name (personalized name) is the name of this unit displayed on the network (Maximum 63 characters).

  1. Press **MENU**. (Turns on the Menu settings mode and the Menu appears on the display (page 11, "Menu map").)

  2. Use \( \Delta \nabla \) to select “Network” – “Friendly Name”, then press **ENTER** or \( \triangleright \). ("Friendly Name" menu appears.)

  3. Use \( \Delta \nabla \) to select the friendly name (Marantz NA-11S1), then press **ENTER**.

  4. Edit a friendly name.
     - For character input, see page 40.

- **Last.fm Display**
  Set whether or not to display Last.fm item on the menu.

  1. Press **MENU**. (Turns on the Menu settings mode and the Menu appears on the display (page 11, "Menu map").)

  2. Use \( \Delta \nabla \) to select “Network” – “Last.fm Display”, then press **ENTER** or \( \triangleright \). ("Last.fm Display" appears.)

  3. Use \( \Delta \nabla \) to select “Show” or “Hide”, then press **ENTER** or \( \triangleright \).
     - **Show**
       Last.fm items will be displayed.
     - **Hide**
       Last.fm items will not be displayed.

- **Resetting the friendly name to the default setting**
  In step 3, select “Default” and press **ENTER**.
Setting the audio [Audio]

This unit is equipped with a sound quality adjusting function which allows users to enjoy the desired playback sound quality.
• This setting remains effective even if the power is turned off.

Noise Shaper

Digital feedback is used to improve the low-sound linearity and the noise characteristics of the audible band. Although no difference is observed in the measured values, the sound quality is changed, allowing users to specify a favorite sound quality.

1 Press MENU.
Turns on the Menu settings mode and the Menu appears on the display (page 11 “Menu map”).

2 Use Δ∇ to select “Audio” – “Noise Shaper”, then press ENTER or ▶.
“Noise Shaper” menu appears.

3 Use Δ∇ to select “On” or “Off”, then press ENTER or ▶.
The setting is entered.

NOTE
The Noise Shaper function is disabled during playback of a 32 kHz sampling frequency source and DSD.

DC Filter

This filter is effective in preventing excessive speaker vibration when playing music source where audio with extremely low noise characteristics has been recorded. (The cut frequency is set at 1.7 Hz.)

1 Press MENU.
Turns on the Menu settings mode and the Menu appears on the display (page 11 “Menu map”).

2 Use Δ∇ to select “Audio” – “DC Filter”, then press ENTER or ▶.
“DC Filter” menu appears.

3 Use Δ∇ to select “On” or “Off”, then press ENTER or ▶.
The setting is entered.

NOTE
• The DC Filter function is disabled during playback of a 32 kHz sampling frequency source and DSD.
• The “Noise Shaper”, “DC Filter” and filter characteristics have a last memory function. These settings remain in memory even if the power is turned off.

Digital Out (Setting for the digital output)

1 Press MENU.
Turns on the Menu settings mode and the Menu appears on the display (page 11 “Menu map”).

2 Use Δ∇ to select “Audio” – “Digital Out”, then press ENTER or ▶.
“Digital Out” menu appears.

3 Use Δ∇ to select “On” or “Off”, then press ENTER or ▶.
• When “Digital Out” is set to “Off”, the digital out off indicator lights on the display.
Phase (analog output phase switching)

Switches the output signal phase for balanced outputs. The unit’s balanced output conforms to USA system. This setting must be set to “Inverted” in order to execute balanced outputs to a European system amplifier with a different (inverted) phase.

1. Press **MENU**. Turns on the Menu settings mode and the Menu appears on the display (page 11 “Menu map”).

2. Use \( \triangle \nabla \) to select “Audio” – “Phase”, then press **ENTER** or \( \triangleright \). “Phase” menu appears.

3. Use \( \triangle \nabla \) to select “Normal” or “Inverted”, then press **ENTER** or \( \triangleright \).

   - **Normal**: USA system.
   - **Inverted**: European system.

Setting the audio [Audio]
Operation

Here, we explain functions and operations that let you make better use of this unit.

- Preparation  page 21
- Operations possible during playback  page 21
- Network audio playback  page 23
- Favorite function  page 29
- iPod playback  page 30
- USB memory device playback  page 32
- AirPlay function  page 34
- Remote play function  page 36
- Web control function  page 37
- Using as a D/A converter  page 39
- Other functions  page 40
**Operations possible during playback**

### Selecting the input source

#### Selecting the input source using the main unit

1. Press **INPUT**. The display changes to the input source selection screen.

2. Press **△ ▽** to select the input source. The input source is switched each time the button is pressed.

#### Selecting the input source using the remote control

Press the input source select button (INTERNET RADIO, MUSIC SERVER, ONLINE MUSIC, USB, DIGITAL IN). The desired input source can be selected directly.

The input source is switched as follows each time DIGITAL IN is pressed:

- **PC**
- **Optical**
- **Coaxial**

- **Online Music** is pressed:
  - **Spotify**
  - **Last.fm**

With this unit, you can play back music files stored on your iPhone/iPod touch and music from iTunes (page 34 “AirPlay function”).

### Preparation

#### Turning the power on

Press **(on/standby)**. Power is turned on and the STANDBY indicator goes off.

- You can also switch the power to standby by pressing **ON/STANDBY** on the main unit.

#### Turning the power to standby mode

Press **(on/standby)**. The unit enters standby mode.

- **STANDBY** indicator
  - Normal standby : Red
  - “Network Control” – “On” : Orange
  - iPod charge standby : Orange

**NOTE**

Power continues to be supplied to some of the circuitry even when the power is in the standby mode. When leaving home for long periods of time, unplug the power cord from the power outlet.

### Completely turning off the power

Unplug the power cord from the wall outlet.
Setting the sleep timer

Use this function to automatically switch the power to the standby mode after a specific amount of time (minutes).

Press SLEEP during playback and select the setting time.
- The sleep timer can be set to up to 90 minutes, in steps of 10 minutes.
- After about 3 seconds, the setting is entered and the display returns to as it was before.

Canceling the sleep timer

Either press SLEEP to select “Sleep ▶ OFF” or press (on/standby).

To check the time remaining until the sleep timer is activated

Press SLEEP.

Switching the display’s brightness

The display brightness is adjusted each time DIMMER is pressed as shown below.

- When the display brightness is set to “Off”, the DISPLAY OFF indicator lights on the display.

If you operate the buttons when the display brightness is set to “Off”, the display temporarily lights at “100%” brightness level.

Listening with headphones

Plug the headphones (sold separately) into the headphone jack (PHONES).

Adjusting the Volume

Turn LEVEL on the main unit.

NOTE
To prevent hearing loss, do not raise the volume level excessively when using headphones.

Switching the filter characteristics

2 filter characteristic types can be selected for DSD source, and for PCM source. The 2 filter characteristics types are explained below.

<table>
<thead>
<tr>
<th>Filter Type</th>
<th>PCM source</th>
<th>DSD source</th>
</tr>
</thead>
<tbody>
<tr>
<td>Filter 1</td>
<td>Offers a short impulse response for both pre-echo and post-echo. Suitable for large-information-content audio. Produces a deep sound image with clearly-defined positional relationships of the audio sources.</td>
<td>This is a direct mode in which there is no filtering versus the DSD data (Super Audio CD recording signal). The original source data is reproduced as it is, along with the original texture and space.</td>
</tr>
<tr>
<td>Filter 2</td>
<td>This filter offers asymmetrical impulse response. The post-echo is slightly longer than the pre-echo. Resembles analog sound quality.</td>
<td>DSD data exceeding 100 kHz is attenuated. Also equipped with DACs for normal-phase and inverted-phase signals (23 each). The asymmetrical DAC operation gives priority to the resolution, resulting in a smoother sound.</td>
</tr>
</tbody>
</table>

Press FILTER.
- The setting cycles through the 2 modes (Filter 1/Filter 2) as shown below each time the button is pressed.

NOTE
The “Noise Shaper”, “DC Filter” and filter characteristics have a last memory function. These settings remain in memory even if the power is turned off.
Network audio playback

Follow this procedure to play Internet radio stations or music files stored on a computer.

1. **About the Internet Radio function** ([page 46])
2. **About Music server** ([page 46])
3. **About Last.fm** ([page 47])
4. **About Spotify** ([page 47])

Listening to Internet Radio

1. **Prepare for playback.**
   - Check the network environment, then turn on this unit’s power ([page 21] “Turning the power on”).
   - If settings are required, make the “Setting the network [Network]” ([page 15]).

2. **Press INTERNET RADIO to switch the input source to “Internet Radio”.**
   - For details on selecting the input source using the unit buttons, see “Selecting the input source using the main unit” ([page 21]).

3. **Press △ ▽ to select the item you want to play, then press ENTER or ▶.**

4. **Repeat step 3 until the station list is displayed.**
   - The station list is displayed.
   - Any characters that cannot be displayed are replaced with “.” (period) or “ ” (space).

5. **Press △ ▽ to select the station, then press ENTER or ▶.**
   - Playback starts once buffering reaches “100%”.

- **Switching the display**
  - Press INFO during Internet radio reception.
  - The broadcast station information and signal format bit rate are displayed.

- **Recently played Internet Radio stations**
  - Recently played Internet Radio stations can be selected from “Recently Played”.
  - Up to 20 stations can be stored in “Recently Played”.

  1. On a top menu of the Internet Radio station, press △ ▽ to select “Recently Played”, then press ENTER or ▶.
  2. Press △ ▽ to select the item you want to play, then press ENTER or ▶.

- **Searching stations by keyword**
  - (Alphabetic strings)

  1. Press △ ▽ to select “Search by Keyword”, then press ENTER or ▶.
  2. Use △ ▽ ▶ or 0 – 9, +10 to input the characters, then press ENTER.

- **Registering Internet Radio stations as your favorites**
  - You can register your favorite Internet stations in the Favorite List ([page 29]).

- **Internet radio operation**
  - **Operation buttons**
    - **FAVORITES ADD**:
      - Registration to the Favorite list
    - **FAVORITES CALL**:
      - Call from the Favorite list
    - **△ ▽ ▶**:
      - Cursor operation (Up/Down/Left/Right)
    - **ENTER**:
      - Enter
    - **MENU**:
      - Menu
    - **SEARCH**:
      - Character search
  - **Function**
    - Registration to the Favorite list
    - Call from the Favorite list
    - Cursor operation (Up/Down/Left/Right)
    - Enter
    - Menu
    - Character search

  - **Stop**

- Press SEARCH, then press ENTER to select the first letter you want to search mode.

  If the list is not in alphabetical order, you may not be able to perform a character search.
Applying media sharing settings

Here, we apply the settings to share music files stored on a PC and NAS on the network.

Sharing media stored on a PC

If you are using a media server, be sure to apply this setting first.

When using Windows Media Player 12
(Windows 7, Windows 8)

NOTE
Perform this procedure after changing the control panel display to "Category".

1. In the PC’s “Control Panel”, select “Network and Internet” – “Choose homegroup and sharing options”.

2. Select the “Stream my pictures, music, and videos to all devices on my home network” check box and select “Choose media streaming options”.

3. Select “Allowed” in the drop-down list for “Marantz NA-11S1”.

4. Select “Allowed” in the drop-down list for “Media programs on this PC and remote connections...”.

5. Click “OK” to finish.

When using Windows Media Player 11

1. Start up Windows Media Player 11 on the PC.

2. Select “Media Sharing” in the “Library”.

3. Click the “Share my media” check box, select “Marantz NA-11S1”, and then click “Allow”.

4. As you did in step 3, select the icon of the device (other PCs and mobile devices) you want to use as a media controller, and then click “Allow”.

5. Click “OK” to finish.

Sharing media stored on a NAS device

Change settings on the Network Attached Storage (NAS) device to allow this unit and other devices (PCs and mobile devices) used as media controllers to access the NAS. For details, see the owner’s manual that came with the NAS.
Playing files stored on a PC and NAS

Use this procedure to play music files or playlists.

1 Prepare for playback.
   ① Check the network environment, then turn on this unit’s power (page 21 “Turning the power on”).
   ② If settings are required, make the “Setting the network [Network]” (page 15).
   ③ Prepare the computer (page 24 “Applying media sharing settings”, page 46 “About Music server”).

2 Press MUSIC SERVER to switch the input source to “Music Server”.
   • For details on selecting the input source using the unit buttons, see “Selecting the input source using the main unit” (page 21).

3 Press △▼ to select the server including the file to be played, then press ENTER or ▶.

4 Press △▼ to select the search item or folder, then press ENTER or ▶.

5 Repeat step 4 until the file is displayed.

6 Press △▼ to select the file, then press ENTER or ▶.
   Playback starts once buffering reaches “100%”.

   • Connections to the required system and specific settings must be made in order to play music files (page 8).
   • Before starting, you must launch the computer’s server software and set the files as server contents. For details, see the operating instructions of your server software.
   • The order in which the tracks/files are displayed depends on the server specifications. If the tracks/files are not displayed in alphabetical order due to the server specifications, searching by the first letter may not work properly.
   • WMA Lossless files can be played when using a server supporting transcoding, such as Windows Media Player Ver. 11 or later.

   NOTE
   When playing back music files with your PC or NAS connected through wireless LAN, audio may be interrupted depending on your wireless LAN environment. In this case, play back music files with your PC or NAS connected through wired LAN.

   □ Playing repeatedly (Repeat playback) (page 32)

   □ Playing random order (Random playback) (page 32)

   □ Switching the display

   During playback, press INFO.
   • The display switches each time INFO is pressed.

   Artist name
   Album name
   File type/Bit rate or Sampling Frequency

   □ Music server operation

*1 Press SEARCH, then press ENTER to select the first letter you want to search mode.
*2 This function is available while an MP3 / WAV / AAC / FLAC file is being played back.
*3 During random playback of files stored on a PC, each time playback of a track is completed, another track is randomly selected for playback from tracks in the folder.

   • If the list is not in alphabetical order, you may not be able to perform a character search.
   • Depending on the server being used, some functions may be limited.
Listening to Last.fm

Last.fm radio is not available in all countries. Please check www.last.fm/hardware for more information. You'll also need a subscription. Get one today at www.last.fm/subscribe.

1 Prepare for playback.
   ① Make sure this unit is connected to the Internet, then turn on this unit's power (page 21 "Turning the power on").
   ② If settings are required, make the “Setting the network [Network]” (page 15).

2 Press ONLINE MUSIC to switch the input source to “Last.fm”.
   • For details on selecting the input source using the unit buttons, see “Selecting the input source using the main unit” (page 21).
   • If you do not have a Last.fm account, press ◄ to select “I am new to Last.fm”. Then press ENTER or ►.
     Create an account in accordance with the instructions on the display.

3 If you have a Last.fm account, press ◄ to select “I have a Last.fm account”. Then press ENTER or ►.

4 Use △ ◄ to enter your username and password.
   • For character input, see page 40.

5 After inputting the username and password, select “login”, then press ENTER.
   If the username and password match, the top menu for Last.fm is displayed.
   • The types of characters that can be input are as shown below.

   ![Diagram of character input]

   - **Username**
     Lower case characters: a b c d e f g h i j k l m n o p q r s t u v w x y z
     Symbols: _ -
     Numbers: 0 1 2 3 4 5 6 7 8 9

   - **Password**
     Lower case characters: a b c d e f g h i j k l m n o p q r s t u v w x y z

     Numbers: 0 1 2 3 4 5 6 7 8 9

6 Use △ ◄ to select menu and then press ENTER or ►.

   - **Popular Tags** Play popular tags in your area.
   - **Popular Artists** Play popular artists tags in your area.
   - **Your Recent Stations** Play your recent stations.
   - **Your Recommended Radio** Play your recommended radio.
   - **Your Library** Play your library.
   - **Your Friend’s Radio** Play your friend’s radio.
   - **Your Top Artists** Play your top Artists.
   - **Search Tag Radio** You can search station by Tag.
   - **Search Artist Radio** You can search station by Artist.

7 Use △ ◄ to select a station, and press ENTER, ► or ►/□ to start playback.
   Playback starts.
When you press ▶ during playback, the following menu appears.

Love this track Loving tracks improves your Last.fm recommendations, and you can optionally share them on popular social networks.

Ban this track If you ban a track, we won’t play it again. You can undo this on the Last.fm website.

Scrobbling Scrobbling sends the tracks you played to your Last.fm account. You can see charts of the music you’ve been listening to, get recommendations for new music and events in your area and share your listening tastes with your friends. You can turn this service on or off using this option. The more you scrobble, the better your recommendations will become.

NOTE The password should be no longer than 90 characters

Log out
Disassociate this unit from your Last.fm account.

1 While the Last.fm top menu is displayed, use △ ▽ to select “Log Out”, then press ENTER.

2 Use △ ▽ to select “OK”, then press ENTER.

Switching the display
During playback, press INFO.
The file type/bit rate, artist name and album name are displayed.

Listening to Spotify
Introduce your Marantz to a whole new world of music. With Spotify, you can enjoy instant access to millions of songs. A Spotify Premium subscription is required. For details, see the Spotify homepage.
http://www.spotify.com

Prepare for playback.
① Make sure this unit is connected to the Internet, then turn on this unit’s power (page 21, “Turning the power on”).
② If settings are required, make the “Setting the network [Network]” (page 15).
③ Complete step 4 and obtain a Spotify account.
• If you already have a Spotify account, you do not need to obtain a new account. Use your existing Spotify account.

Press ONLINE MUSIC to switch the input source to “Spotify”.
• For details on selecting the input source using the unit buttons, see “Selecting the input source using the main unit” (page 21).

If you have a Spotify account, then press ENTER.
4 Use △ ▽ to enter your username and password.

[Upper case characters/Numbers/Symbols]
ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
0123456789
! " # $ % & ’ ( ) * + , - . / : ; < = >

• When you enter the Spotify account and Search text, you can use number buttons to select characters with diacritical marks. You can also select the base character and then press MODE to change diacritical marks.
• For character input, see page 40.

5 After inputting the username and password, select “login”, then press ENTER.

When the user name and password match, the registration confirmation message scrolls.

• To continue, press ENTER and select “[accept]”. The Spotify Top menu is displayed. To go back, press ◄ and select “[back]”.

6 Use △ ▽ to select menu and then press ENTER or ▶.

- Search
  Searches for tracks, artists and albums by entering keywords.
- What’s New
  Displays the list of the latest albums.
- Starred
  Displays the list of the starred tracks.
- Playlists
  Displays the playlists for Spotify.
- Accounts
  Manages accounts (Log out, Add new user, Switch to user).

7 Use △ ▽ to select a station, and press ENTER, ▶ or ▶/II to start playback.

Playback starts.

8 When you press ▶ during playback, the following menu appears.

- Star this track
  Adds a star to the selected track.
- Browse “Artist name”
  Displays the list of albums by the artist of the track that is being played back.
- Browse “Album name”
  Displays the list of tracks on the album that is being played back.

Switching the display

During playback, Press INFO.
The display switches between artist name and album title each time the button is pressed.

Spotify operation

<table>

6

7

8
This section provides information on the Favorite function.

• The Favorite function allows you to register your favorite broadcast stations and files in the Favorite List in advance so that you can call and listen to the stations or files right away, whenever you want.
• The contents that you can register and call are Internet radio station and music server.
• You can register up to 50 items in the Favorite List.

Registering stations or files to the favorites list

1 Press FAVORITES ADD while the Internet radio station or file to register is played back.
• “Favorite” menu appears.

2 Press ▲▼ to select a number to register the station or file, and press ENTER.
• “Added To Favorites” is displayed and the registration is competed.

Calling stations or files from the favorites list

1 Press FAVORITES CALL.
   The Favorite list appears.

2 Press ▼ or ▲ to select the station or file that you want to call, and press ENTER.
   The respective function starts up and playback starts.
• Press 0 – 9, +10 to call files registered to the Favorite list by number.

Deleting stations or files from the favorite list

1 Press FAVORITES CALL.
   The Favorite list appears.

2 Press ▲ to select the station or file that you want to delete, and press CLEAR.

3 When the prompt “Delete?” appears, press ENTER.
   “Deleted” is displayed and the deletion is competed.

To switch between registered stations and files during playback
Press ◄► or ▲▼.

To cancel the operation
Press ◄.
### iPod playback

The unit can play back music stored on an iPod, iPod touch, iPod classic, iPod nano and iPhone.

**iPod** ([page 45](#))

1. **Press** Ω (on/standby) to turn on power to the main unit.

2. **Press** USB to switch the input source to “USB”.
   - For details on selecting the input source using the unit buttons, see “Selecting the input source using the main unit” ([page 21](#)).

3. **Press** MODE to select the display mode.
   - The display mode switches each time MODE is pressed.
   - There are two modes for displaying the contents recorded on the iPod.

   **Remote mode**
   - Display iPod information on the display of this unit.

   **Direct mode**
   - Display iPod information on the iPod screen.
   - “Direct iPod” is displayed on the display of this unit.

* Only audio is played back.

**NOTE**

- When connecting an iPhone to this unit, keep the iPhone at least 20 cm away from this unit. If the iPhone is kept closer to this unit and a telephone call is received by the iPhone, noise may be output from this device.
- If the iPod is connected using an iPod cable (commercially available) that is longer than 2 m, sound may not be played correctly. In this case, use a genuine iPod cable, or a cable that is shorter than 1 m.

* Only audio is played back.

**NOTE**

- The default display mode setting is “Direct mode”.

---

4. **Use** ▲▼ to select the item, then press ENTER to select the music file to be played.

5. **Press** ►►/II. Playback starts.
Switching the display

During playback, press INFO.

- The display switches each time INFO is pressed (Remote mode only).

Playing repeatedly (Repeat playback)

(page 32) (Remote mode only)

Playing random order (Random playback)

(page 32)

Disconnecting the iPod

1 Press (on/standby) to set the standby mode.
2 Disconnect the iPod from the USB port.

Charging the iPod

You can charge your iPhone/iPod by connecting it to the USB port.

Standby charging

If the unit enters power standby mode while the iPod/iPhone is charging, the unit will switch to standby charging mode, and the iPod/iPhone will continue to be charged. When in standby charging mode, the power display light turns orange. When the iPhone/iPod is fully charged, the unit automatically stops supplying power for charging and enters normal power standby mode, and the power display light turns red.

Supported iPod models

- iPod classic
  - iPod classic 80GB
  - iPod classic 160GB (2007)
  - iPod classic 160GB (2009)

- iPod nano
  - iPod nano 3rd generation (video) 4GB 8GB
  - iPod nano 4th generation (video) 8GB 16GB
  - iPod nano 5th generation (video camera) 8GB 16GB
  - iPod nano 6th generation 8GB 16GB
  - iPod nano 7th generation 16GB

- iPod touch
  - iPod touch 1st generation 8GB 16GB 32GB
  - iPod touch 2nd generation 8GB 16GB 32GB
  - iPod touch 3rd generation 32GB 64GB
  - iPod touch 4th generation 8GB 32GB 64GB
  - iPod touch 5th generation 32GB 64GB

- iPhone
  - iPhone 4G 8GB 16GB
  - iPhone 3G 8GB 16GB
  - iPhone 3GS 8GB 16GB 32GB
  - iPhone 4 16GB 32GB
  - iPhone 4S 16GB 32GB 64GB
  - iPhone 5 16GB 32GB 64GB
USB memory device playback

You can playback music stored on a USB memory device using this unit.

1 Connect the USB memory device to the USB port.

2 Press (on/standby) to turn on power to the main unit.

3 Press USB to switch the input source to “USB”.
   • For details on selecting the input source using the unit buttons, see “Selecting the input source using the main unit” (page 21).

4 Press △ to select the file or folder, then press ENTER or ▶.

5 Press △ to select the file, then press ENTER, ▶ or ▶/II. Playback starts.

• If the USB memory device is divided into multiple partitions, only the top partition can be selected.
• This unit is compatible with MP3 files conforming to “MPEG-1 Audio Layer-3” standards.
• Marantz does not guarantee that all USB memory devices will operate or receive power. When using a portable USB connection type HDD of the kind to which an AC adapter can be connected to supply power, use the AC adapter.

NOTE
• USB memory devices will not work via a USB hub.
• It is not possible to connect and use a computer via the USB port of this unit using a USB cable.
• Do not use an extension cable when connecting a USB memory device. This may cause radio interference with other devices.
• Files can be read from a USB memory device by connecting the device to this unit. The file reading time varies according to the amount of data saved on the USB memory device. Several minutes may be required to read the maximum permissible number of files and folders.
• Note that Marantz will accept no responsibility whatsoever for any problems arising with the data on a USB memory device when using this unit in conjunction with the USB memory device.

Removing the USB memory device

1 Press (on/standby) to set the standby mode.

2 Check that the communication indicator on the USB memory device is not flashing, then pull out the USB memory device.

NOTE
Do not remove the USB memory device from the unit when the USB memory communication indicator is flashing. Doing so may damage the USB memory device, or may corrupt the files recorded on the USB memory device.

Playing files stored on USB memory devices

Playing repeatedly (Repeat playback)

Press REPEAT.
Repeat playback starts.

• Each time you press REPEAT, the repeat mode is toggled as shown below.

- Single-track repeat
  - Only 1 track plays repeatedly.

- All-track repeat
  - All tracks within the current playback folder are repeated.

- Repeat off
  - Normal playback resumes.

Playing random order (Random playback)

Press RANDOM.
The indicator on the display is lighted and all tracks in the current playback folder are randomly played back.

Canceling random playback

Press RANDOM.
The indicator on the display turns off.
USB operation

<table>

</table>

If the list is not in alphabetical order, you may not be able to perform a character search.
AirPlay function

Enjoy music from your iTunes library with high quality sound anywhere in your home.
Use the Apple Remote app* for iPhone, iPod touch and iPad to control iTunes from any room in your home.
* Available as a free download from the App Store.

Streaming music stored in iPhone, iPod touch, or iPad directly to the unit

If you update your “iPhone/iPod touch/iPad” to iOS 4.2.1 or later, you can stream music stored in your “iPhone/iPod touch/iPad” directly to this unit.

1 Startup iPhone, iPod touch, or iPad music or iPod app.
   is displayed on the iPhone, iPod touch or iPad screen.

2 Tap the AirPlay icon
   Set “Network Control” (page 17) to “On” for this unit.

NOTE
When “Network Control” is set to “On”, the unit consumes more standby power.

3 Select the speaker you want to use.

Playing iTunes music on this unit

1 Install iTunes 10, or later, on a Mac or PC that is connected to the same network as this unit.

2 Turn this unit ON.
   Set “Network Control” (page 17) to “On” for this unit.

NOTE
When “Network Control” is set to “On”, the unit consumes slightly more power in standby mode than when it is in “Network Control – Off” mode. It is still a small amount, however.

3 Launch iTunes and click the AirPlay icon displayed in the lower right of the window and select this unit from the list.

4 Choose a song and click play in iTunes.
The music will stream to this unit.

Selecting multiple speakers (devices)

You can easily stream music from iTunes to multiple speakers in your home.

1 Click the AirPlay icon and select “Multiple Speakers” from the list.

2 Check the speakers you want to use.

Selecting multiple speakers (devices)
Perform iTunes playback operations with the remote control unit of this unit

You can use your Marantz remote control to play and pause iTunes, as well as skip to next and previous tracks.

1 Select “Edit” – “Preferences...” on the menu.
2 Select “Devices” in the iTunes setting window.
3 Check “Allow iTunes audio control from remote speakers”, and then click “OK”.

• Input source will be switched to “AirPlay” when AirPlay playback is started.
• You can stop AirPlay playback by pressing the ◄ or choosing other input source.
• To see artist name or album name together, press INFO.
• For information about how to use iTunes, also see the Help for iTunes.
• The screen may differ depending on the OS and software versions.
• When you connect iPod to the USB connector during AirPlay playback, AirPlay playback stops.
Remote play function

You can use your home network to play back with this unit music files stored on PC, NAS, smartphones and portable audio players. In this case, you use PC, smartphones and portable audio players for operations.

- The relevant devices should comply with the DLNA (Digital Living Network Alliance) Ver. 1.5 standard.
- A wireless LAN environment is required for playing back music files on smartphones or portable audio players.
- For some smartphones, you must install an application for DLNA music playback.

Roles each device plays

The following devices are used for Remote Play. As specified in the DLNA standard, these devices are called DMC, DMS or DMR according to their role.

<table>
<thead>
<tr>
<th>Name (Device example)</th>
<th>Role</th>
</tr>
</thead>
<tbody>
<tr>
<td>DMC (Digital Media Controller)</td>
<td>Perform Remote Play operations. DMC can also play back music files stored on these devices.</td>
</tr>
<tr>
<td>DMS (Digital Media Server)</td>
<td>Stores music files. Music files stored on these devices are played back with DMC.</td>
</tr>
<tr>
<td>DMR (Digital Media Renderer)</td>
<td>Outputs audio of music files played back through Remote Play from speakers. DMR cannot perform playback operations.</td>
</tr>
</tbody>
</table>

Settings required for each device

You must make settings on DMC and DMS for Remote Play. Make the following settings. Also see the owner’s manual of each device for settings.

• Settings on PC and NAS
  Make settings on PC and NAS to exchange data with DMR devices.
  For settings, see “Applying media sharing settings” (page 24).

• Settings on smartphones
  You must install an application for DLNA music playback on your smartphone to perform operations on DMS and this unit (DMR) with your smartphone. The applicable application differs according to your smartphone.

• Settings on portable audio players
  Make settings so that this unit (DMR) can play back music files stored on your portable audio player. For settings, see the owner’s manual of your portable player.

• Settings on this unit
  Connect this unit to the DLNA network. You do not need to make other settings.
  For the network connection, see the provided Getting Started, “Connecting to a home network (LAN)” (page 9) and “Setting the network [Network]” (page 15).

Remote Play operations

Operations are different for each device, but the procedures for preparing for Remote Play are the same. The preparation procedures are shown below.

1. Turn on this unit.
   - Make sure that this unit is connected to the network.

2. Display the music file playback screen on DMC.
   - For PC, open Windows Media Player 12, etc.
   - For smartphones, switch to the music file playback mode.

3. Select the friendly name of this unit for the item that sets the playback device on the playback screen.
   - The default friendly name of this unit is “Marantz NA-11S1”.

4. Start playing back a music file on DMC.
   - The function on this unit automatically switches to Music Server and the Remote Play mark ( ) appears on the display. Remote Play starts.

To exit Remote Play

Press .
The Remote Play mode ends.

Files that can be played back

See “About Music server” (page 46).
Web control function
You can control this unit from a web control screen on a web browser.

- This unit and the PC need to be connected to the network properly (page 8 “Connecting to a home network (LAN)”) in order to use the web control function.
- Depending on the settings of your security-related software, you may not be able to access this unit from your PC. If this is the case, then change the settings of the security-related software.

1 Switch the “Network Control” setting to “On” (page 17).

2 Check the IP address of this unit with “Network Information”.

3 Start up the web browser.

4 Enter the IP address of this unit in browser’s address box.
   For example, if the IP address of this unit is “192.168.100.19”, enter “http://192.168.100.19/”.

5 When the top menu is displayed, click on the menu item you want to operate.

   - Click when you perform a power operation of the unit.
   - Click when you update to the latest information.
   - Normally, there is a change to the latest information each time you operate. When operating from the main unit, click this or else the screen will not be updated.
   - Click to operate the Marantz amp connected by Remote connector cable (page 9).
   - Click “v” to set the sleep timer function.
   - Click a button to change the input source.
   - Click an item to make a FILTER settings.
   - Click when you operate the setup menu.
### Operate.

#### Network Setting

<table>
<thead>
<tr>
<th>Friendly Name</th>

</tr>
</tbody>
</table>

#### Friendly Name setting

1. To change the Friendly Name, enter the new name in the text box and click “Set”.
2. To reset the Friendly Name, click “Set Default”.

#### Network connection settings

1. Click to connect using the newly applied settings.
2. When changing DHCP/proxy settings, input or select for each item.
3. Click when you update firmware (page 13).

**NOTE**

- Items displayed may vary depending on selected items and connection status.
- After selecting each item, wait a moment for the display to be updated.
- To apply network connection settings, click “Test Connection” after making changes.
Using as a D/A converter

Digital audio signals input from an external device or computer into this unit can be converted and output as analog signals using this unit (D/A converter).

Connect and playback from a digital device (Coaxial/Optical)

Press DIGITAL IN to change the input source to “Coaxial” or “Optical”.

The input digital audio signal is displayed as shown.

- "Coaxial PCM xxx kHz" or "Optical PCM xxx kHz" (xxx indicates the sampling frequency.)
- If the sampling frequency cannot be detected, “Signal Unlock” will be displayed.

NOTE
- Linear PCM signals with sampling frequencies of 32 kHz, 44.1 kHz, 48 kHz, 64 kHz, 88.2 kHz, 96 kHz, 176.4 kHz and 192 kHz can be input in the unit.
- Do not input non-PCM signals, such as Dolby Digital, and DTS. This causes noise and could damage the speakers.
- If the sampling frequency switches, such as from A mode to B mode in a CS broadcast, muting may operate for 1 – 2 seconds, cutting the sound.

Connecting and playing back from a computer (USB)

This unit can play both PCM source and DSD source.

Installing the dedicated driver

Before music files saved on a computer can be played on this unit, the dedicated driver must be downloaded from the Marantz website, and installed in the computer. However, drivers do not need to be installed for Mac OS.

NOTE
- The dedicated driver must be installed in the computer before this unit is connected to a computer. Operation will not occur correctly if connected to the computer before the dedicated driver has been installed. Moreover, if the computer is running Windows XP as its OS, the computer’s speed will decrease significantly, and a computer restart may be required.
- Operation may fail in some computer hardware and software configurations.

Computer (recommended system)

OS
- Windows® XP Service Pack3, Windows® Vista, Windows 7 or Windows 8
- Macintosh OSX 10.6.4 or later.

Software
- Server software supporting Windows Media Player® and iTunes.

USB
- USB 2.0: USB High speed/USB Audio Class V2.0

NOTE
- DSD is a registered trademark.
- Microsoft, Windows XP, Windows Vista, Windows 7 and Windows 8 are either registered trademarks or trademarks of Microsoft Corporation in the United States and/or other countries.
- Apple, Macintosh and Mac OS are trademarks of Apple Inc., registered in the U.S. and other countries.

NOTE
- Perform operations such as playback and pause on the computer. At this time, you cannot perform operations with buttons on this unit or the remote control.
- You can also control the volume and equalizer on the computer. Enjoy playing music at the desired volume.
- When this unit is functioning as a D/A converter, sound is not output from the computer’s speakers.
- If the computer is disconnected from this unit while the computer music playback software is running, the playback software may freeze. Always exit the playback software before disconnecting the computer.
- When an abnormality occurs on the computer, disconnect the USB cable and restart the computer.
- The supported sampling frequencies are 32 / 44.1 / 48 / 64 / 88.2 / 96 / 176.4 / 192 kHz (PCM) and 2.8224 MHz (DSD).
- The sampling frequency of the music playback software and sampling frequency displayed on this unit may differ.
- Use a cable that is 3 m or less to connect to the computer.
- If the computer you use is “Mac OS”, please check if the “USB High Speed Audio” format is set below “192000.0 Hz” using the “Audio MIDI Setup”.

Connection

Use the rear panel USB port to connect this unit to a personal computer. For the connection procedure, refer to the “PC connection” (CP page 3) section.

Press DIGITAL IN to change the input source to “PC”.

The input digital audio signal is displayed as shown.

- “PC PCM xxx kHz” or “PC DSD xxx MHz” (xxx indicates the sampling frequency.)
  - If the sampling frequency cannot be detected, “Signal Unlock” will be displayed.
  - When “PC/PCM xxx kHz” is displayed on this unit, wait for approximately 10 seconds, and then start and operate the music playback software on the computer. This unit functions as a D/A converter.
Other functions

Inputting characters

On this unit, the names displayed for “Friendly Name” and search, screens can be changed as desired. For inputting characters, there are two methods, as shown below.

<table>
<thead>
<tr>
<th>Method</th>
<th>Operations</th>
</tr>
</thead>
<tbody>
<tr>
<td>Using the number buttons</td>

<td>unit.</td>
</tr>
<tr>
<td></td>
<td>• Use △△&lt;△&gt; and ENTER to input characters.</td>
</tr>
</tbody>
</table>

Display of an input screen

[Friendly name input]

- The current input character type is displayed.
  - a: Lower case
  - A: Upper case
  - 1: Numerics
  - ä: Lowercase characters with a diacritical mark
  - Ä: Uppercase characters with a diacritical mark

Using the number buttons

1. Display the screen for inputting characters.
2. Place the cursor at the character to be changed with △△.
3. Press +10 to select the character type (upper case, lower case, or numeric characters), and press 0 – 9 to select the desired character.

Using the number buttons

- When you enter the Spotify account and Search text, you can select character types with a diacritical mark.
- The types of characters that can be input are as shown below.

<table>
<thead>
<tr>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>

- Press CLEAR to delete the character.
- For entering the characters assigned to one number button continuously, press △ to move the cursor to the right after entering a character then enter the next character.
- For entering characters assigned to separate buttons, press the number button continuously. The cursor automatically moves to the next position, and the entered character is registered.

Example: For changing characters from “POPS” to “ROCK”

1. Place the cursor at “P”.
2. Press CLEAR. “P” is deleted.
3. Press +10 to set the character type to upper case.
4. Press +10 three times. “R” is input.
5. Press △△ twice. “R” is automatically registered, and the cursor placed “P”.
6. Press △△ three times. “C” is input.
7. Press △△ twice. “C” is automatically registered, and “K” is input.
8. Press △△ once. Place the cursor at “P”.
9. Press CLEAR twice. “P” and “S” are deleted.
10. Press ENTER to register the input name.
Using the cursor buttons

1 Display the screen for inputting characters.

2 Use ◄► to set the cursor to the character you want to change.

3 Use △▽ to change the character.

• The types of characters that can be input are as shown below.

<table>
<thead>
<tr>

*Note*

- The supplied remote control can operate Marantz amplifiers.
- When using it, also refer to the operating instructions of the other devices.

**NOTE**

The remote control may not operate some devices.
“Made for iPod” and “Made for iPhone” mean that an electronic accessory has been designed to connect specifically to iPod, or iPhone, respectively, and has been certified by the developer to meet Apple performance standards.

Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards. Please note that the use of this accessory with iPod, or iPhone, may affect wireless performance.

AirPlay, the AirPlay logo, iPhone, iPod, iPod classic, iPod nano, iPod shuffle, and iPod touch are trademarks of Apple Inc., registered in the U.S. and other countries.

Individual users are permitted to use iPhone, iPod, iPod classic, iPod nano, iPod shuffle, and iPod touch for private copy and playback of non-copyrighted contents and contents whose copy and playback is permitted by law. Copyright infringement is prohibited by law.

### iPod

“Made for iPod” and “Made for iPhone” mean that an electronic accessory has been designed to connect specifically to iPod, or iPhone, respectively, and has been certified by the developer to meet Apple performance standards.

Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards. Please note that the use of this accessory with iPod, or iPhone, may affect wireless performance.

AirPlay, the AirPlay logo, iPhone, iPod, iPod classic, iPod nano, iPod shuffle, and iPod touch are trademarks of Apple Inc., registered in the U.S. and other countries.

Individual users are permitted to use iPhone, iPod, iPod classic, iPod nano, iPod shuffle, and iPod touch for private copy and playback of non-copyrighted contents and contents whose copy and playback is permitted by law. Copyright infringement is prohibited by law.

### Important information

- Only USB memory devices conforming to mass storage class and MTP (Media Transfer Protocol) standards can be played on this unit.
- This unit is compatible with USB memory devices in “FAT16” or “FAT32” format.
- This unit is compatible with MP3 files conforming to “MPEG-1 Audio Layer-3” standards.
- File types that this unit can play back and specifications are shown below.

#### Supported file types

<table>
<thead>
<tr>
<th>Supported file types</th>
<th>USB memory devices</th>
</tr>
</thead>
<tbody>
<tr>
<td>WMA (Windows Media Audio)</td>
<td>✔️ #2</td>
</tr>
<tr>
<td>MP3 (MPEG-1 Audio Layer-3)</td>

<td>ALAC (Apple Lossless Audio Codec)</td>
<td>✔</td>
</tr>
</tbody>
</table>

*1 USB memory device

- This unit is compatible with MP3 ID3-Tag (Ver. 2) standard.
- This unit is compatible with WMA META tags.
- WAV format Quantization bit length: 16 or 24 bits.
- FLAC format Quantization bit length: 16 or 24 bits

*2 Only files that are not protected by copyright can be played on this unit. Content downloaded from pay sites on the Internet are copyright protected. Also, files encoded in WMA format when ripped from a CD, etc. on a computer may be copyright protected, depending on the computer’s settings.

*3 Copyright-protected files can be played on certain portable players compatible with MTP.

**NOTE**

File types that this unit does not support are not displayed.

Network audio

Important information

About the Internet Radio function
• Internet radio refers to radio broadcasts distributed over the Internet. Internet radio stations from around the world can be received.
• This unit is equipped with the following Internet radio functions:
  • Stations can be selected by genre and region.
  • Internet radio stations in MP3 and WMA (Windows Media Audio) format can be listened to.
  • Your favorite radio stations can be registered by accessing an exclusive Marantz Internet radio URL from a Web browser on a computer.
  • The function is managed for individual users, so you must provide your MAC or e-mail address.
  • Exclusive URL: http://www.radiomarantz.com
  • The radio station database service may be suspended without notice.
  • This unit’s Internet radio station list is created using a radio station database service (vTuner). This database service provides a list edited and created for this unit.

About Music server
This function lets you play music files and playlists (.m3u, .wpl) stored on a computer (music server) connected to this unit via a network. With this unit’s network audio playback function, connection to the server is possible using one of the technologies below.
• Windows Media Player Network Sharing Service
• Windows Media DRM10

[Types of files that can be played back by each function]

<table>
<thead>
<tr>
<th></th>
<th>Internet radio</th>
<th>Music server</th>

<td>✓</td>
<td>✓</td>
</tr>
<tr>
<td>ALAC</td>
<td></td>
<td>✓</td>
</tr>
</tbody>
</table>

A server or server software compatible with distribution in the corresponding formats is required to play music files via a network.

*1 Music server
• This unit is compatible with MP3 ID3-Tag (Ver. 2) standard.
• This unit is compatible with WMA META tags.
• If the image size (pixels) of an album artwork exceeds 500 x 500 (WMA/MP3/WAV/FLAC) or 349 x 349 (MPEG-4 AAC), then music may not be played back properly.

*2 Only files that are not protected by copyright can be played on this unit.
Content downloaded from pay sites on the Internet are copyright protected. Also, files encoded in WMA format when ripped from a CD, etc. on a computer may be copyright protected, depending on the computer’s settings.

USB memory device

Maximum Number of Playable Files and Folder
The limits on the number of folders and files that can be displayed by this unit are as follows.

<table>
<thead>
<tr>
<th>Item</th>
<th>Media</th>
<th>USB memory devices</th>
</tr>
</thead>
<tbody>
<tr>
<td>Memory capacity</td>
<td>FAT16: 2 GB, FAT32: 2 TB</td>
<td></td>
</tr>
<tr>
<td>Number of folder directory levels</td>
<td>8 levels</td>
<td></td>
</tr>
<tr>
<td>Number of folders</td>
<td>500</td>
<td></td>
</tr>
<tr>
<td>Number of files *2</td>
<td>5000</td>
<td></td>
</tr>
</tbody>
</table>

*1 The limited number includes the root folder.
*2 The allowable number of files may differ according to the USB memory device capacity and the file size.

46
About Last.fm

Last.fm learns what you love... and it’s a great way to discover new music.

Your new Marantz Network Audio Player is very clever. You can create a free Last.fm profile when you start using your Marantz Network Audio Player and magically keep track of all the songs you hear.

When you sign in at www.last.fm, you can see your top music charts, view thousands of reviews, biographies and artwork, and get recommendations for local performances you won’t want to miss.

With an affordable subscription you can enjoy an endless choice of personalised ad-free radio stations. Check out www.last.fm/subscribe today for more details.

Your subscription also gives you access to Last.fm radio on a great range of music products, including your Marantz Network Audio Player. This feature is not available in all countries. Visit www.last.fm/hardware to find out more.

About Spotify

Introduce your Marantz to a whole new world of music. With Spotify, you can enjoy instant access to millions of songs.

A Spotify Premium subscription is required. For details, see the Spotify homepage.

**NOTE**

- Particularly when you play back large music files, depending on your wireless LAN environment, the playback sound may be interrupted. In this case, make the wired LAN connection.
- Variable Bit rate (VBR) is not supported (when playback is possible, the time display in the display window will speed up and slow down).
Sampling frequency
Sampling involves taking a reading of a sound wave (analog signal) at regular intervals and expressing the height of the wave at each reading in digitized format (producing a digital signal).

The number of readings taken in one second is called the “sampling frequency”. The larger the value, the closer the reproduced sound is to the original.

### Explanation terms

- **AirPlay**: AirPlay sends (plays) contents recorded in iTunes or on an iPhone/iPod touch to a compatible device via the network.

- **ALAC (Apple Lossless Audio Codec)**: This is a codec for lossless audio compression method developed by Apple Inc. This codec can be played back on iTunes, iPod or iPhone. Data compressed to approximately 60 – 70% can be decompressed to exactly the same original data.

- **App Store**: App Store is a site that sells application software for such devices as the iPhone or iPod Touch, and is operated by Apple Inc.

- **Bit rate**: This expresses the read amount per 1 second of video/audio data recorded in a disc. A larger number means higher sound quality, but also means a larger file size.

- **DLNA**: DLNA and DLNA CERTIFIED are trademarks and/or service marks of Digital Living Network Alliance. Some contents may not be compatible with other DLNA CERTIFIED® products.

- **DSD (Direct-Stream Digital)**: This is an audio data recording method. Audio signals are stored on media such as Super Audio CDs as delta-sigma modulated digital audio. The signal is composed of single-bit values at a sampling rate of 2.8224MHz.

- **FLAC**: FLAC stands for Free lossless Audio Codec, and is a lossless free audio file format. Lossless means that the audio is compressed without any loss in quality. The FLAC license is as shown below.

  Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:
- Redistributions of source code must retain the above copyright notice, this list of conditions and the following disclaimer.
- Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.
- Neither the name of the Xiph.org Foundation nor the names of its contributors may be used to endorse or promote products derived from this software without specific prior written permission.

  THIS SOFTWARE IS PROVIDED BY THE COPYRIGHT HOLDERS AND CONTRIBUTORS “AS IS” AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE FOUNDATION OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

- **iTunes**: iTunes is the name of the multimedia player provided by Apple Inc. It enables management and playback of multimedia contents including music and movies. iTunes supports many main file formats including AAC, WAV, and MP3.

- **MP3 (MPEG Audio Layer-3)**: This is an internationally standardized audio data compression scheme, using the “MPEG-1” video compression standard. It compresses the data volume to about one eleventh its original size while maintaining sound quality equivalent to a music CD.

- **MPEG (Moving Picture Experts Group), MPEG-2, MPEG-4**: These are the names for digital compression format standards used for the encoding of video and audio.

  Video standards include “MPEG-1 Video”, “MPEG-2 Video”, “MPEG-4 Visual”, “MPEG-4 AVC”. Audio standards include “MPEG-1 Audio”, “MPEG-2 Audio”, “MPEG-4 AAC”.

- **Windows Media DRM**: This is a copyright protection technology developed by Microsoft. Content providers are using the digital rights management technology for “Windows Media” contained in this device (WM-DRM) to protect the integrity of their content (Secure Content) so that their intellectual property, including copyright, in such content is not misappropriated. This device uses WM-DRM software to play Secure Content (WM-DRM Software). If the security of the WM-DRM Software in this device has been compromised, owners of Secure Content (Secure Content Owners) may request that Microsoft revoke the WM-DRM Software’s right to acquire new licenses to copy, display and/or play Secure Content. Revocation does not alter the WM-DRM Software’s ability to play unprotected content.

  A list of revoked WM-DRM Software is sent to your device whenever you download a license for Secure Content from the Internet or from a PC.

  Microsoft may, in conjunction with such license, also download revocation list onto your device on behalf of Secure Content Owners.

- **vTuner**: vTuner is a free online content server for Internet radio. Note that usage fees are included in upgrade costs. For inquiries about this service, visit the vTuner site below.

  vTuner website: http://www.radiomaranzy.com

  This product is protected by certain intellectual property rights of Nothing Else Matters Software and BridgeCo. Use or distribution of such technology outside of this product is prohibited without a license from Nothing Else Matters Software and BridgeCo or an authorized subsidiary.
Windows Media Player Ver. 11 or later
This is a media player distributed free of charge by Microsoft Corporation.
It can be used to play playlists created with Windows Media Player Ver. 11 or later as well as files in such formats as WMA, DRM WMA, MP3 and WAV.

WMA (Windows Media Audio)
This is audio compression technology developed by Microsoft Corporation.
WMA data can be encoded using Windows Media Player.
To encode WMA files, only use applications authorized by Microsoft Corporation. If you use an unauthorized application, the file may not work properly.
## Troubleshooting

If a problem occurs first check the following:
1. Are the connections correct?
2. Is the set being operated as described in the owner’s manual?
3. Are the other devices operating properly?

If this unit does not operate properly, check the items listed in the table below. If the problem persists, there may be a malfunction.

In this case, disconnect the power immediately and contact your retail outlet.

### [General]

### Symptom Cause Countermeasure Page

**For some radio stations, “Server Full” or “Connection Down” is displayed and station cannot be connected to.**
- Station is congested or not currently broadcasting.
- Wait a while before trying again.

**Sound is broken during playback.**
- Network’s signal transfer speed is slow or communications lines or radio station is congested.
- This is not a malfunction. When playing broadcast data with a high bit rate, the sound may be broken, depending on the communications conditions.

**Sound quality is poor or played sound is noisy.**
- File being played has a low bit rate.
- This is not a malfunction.

- Check the network environment.

**Cannot access the Last.fm. (“Not available in your country” is displayed.)**
- You are accessing the network from a country where Last.fm radio is not available.
- Last.fm radio is not available in all countries. Please check www.last.fm/hardware for more information.

**Cannot login to Last.fm. (“Incorrect user or password” is displayed.)**
- Incorrect username or password entered for login authentication.
- Enter the correct username and password and retry login.

**Cannot create and register an account. (“Try another username” is displayed.)**
- The username has already been taken.
- Enter another username to create and register the account.
## AirPlay

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause</th>
<th>Countermeasure</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>The AirPlay icon 📱 is not displayed in iTunes or on the iPhone/iPod touch.</td>
<td>• This unit and the computer or iPhone/iPod touch are not connected to the same network (LAN). • iTunes or the iPhone/iPod touch do not have firmware that supports AirPlay installed.</td>
<td>• Connect the computer or iPhone/iPod touch to the same network as this unit. • Update to the latest firmware.</td>
<td>8</td>
</tr>
<tr>
<td>No sound.</td>
<td>• This unit is not selected in the screen that is displayed when iTunes or the iPhone/iPod touch is started.</td>
<td>• Start iTunes or switch on the iPhone/iPod touch, click the AirPlay icon 📱 in the displayed screen, and select this unit.</td>
<td>34</td>
</tr>
<tr>
<td>When using AirPlay with the iPhone/iPod touch/iPad, the sound suffers from intermittent breaks or AirPlay does not function.</td>
<td>• Some applications are running in the background on iPhone/iPod touch/iPad. • When playing via a wireless connection, outside conditions may affect the unit. • The iPhone/iPod touch/iPad application or iTunes is not the latest version.</td>
<td>• Quit the application running in the background of the iPhone/iPod touch/iPad, and then play using AirPlay. • To remedy this, change the network environment, e.g. shorten the distance to the wireless LAN access point. • Update the iPhone/iPod touch/iPad application or iTunes to the latest version.</td>
<td>–</td>
</tr>

Resetting the microprocessor

Perform this procedure if the display is abnormal or if operations cannot be performed. When the microprocessor is reset, all the settings are reset to their default values and all previously stored custom settings will be have to be manually restored.

1. Pull the power cord out of the power outlet.
2. Plug the power cord into a power outlet while pressing ENTER and INPUT on the main unit.
3. When the STANDBY indicator lights, release the buttons.

“Initialized” appears in the display.

If “Initialized” does not display in step 3, start over from step 1.

Specifications

- **Audio performance**
  - **Analog output**
    - Channels: 2 channels
    - Playable frequency range: 2 Hz – 96 kHz
    - Playable frequency response:
      - 2 Hz – 50 kHz (–3 dB) (DSD mode, PCM sampling frequency: 192 kHz)
      - 2 Hz – 20 kHz (PCM sampling frequency: 44.1 kHz)
  - **S/N:** 110 dB (Audible Range)
  - **Dynamic Range:** 110 dB (Audible Range)
  - **Harmonic Distortion:** 0.001 % (1 kHz, Audible Range)
  - **Output Level**
    - Unbalanced: 2.3 V RMS Stereo
    - Balanced: 4.6 V RMS Stereo
  - **Headphone output:** 30 mW/32 Ω/ohms (variable maximum)
  - **Digital output**
    - Coaxial: 0.5 Vp-p
    - Optical: –19 dBm
  - **Digital input**
    - Coaxial: 0.5 Vp-p
    - Optical: –27 dBm or later
  - **USB (Front)**
    - Type A (USB 2.0 High speed)
  - **USB (Rear)**
    - Type B (USB 2.0 High speed)

- **Power supply**
  - **Power supply voltage/frequency:** AC 230 V, 50/60 Hz
  - **Power consumption:** 50 W
  - **Power consumption in standby mode:** 0.4 W
  - **Power consumption in “Network Control” – “On” mode:** 3 W

The above copyright notice and this permission notice shall be included in all copies or substantial portions of the Software.

c. You may otherwise modify Your copy of this Work (excluding the Articles) in any way to create a Derivative Work, provided that You insert a prominent notice in each modified file stating how, when and where You changed that file.

d. You may distribute the standard version of the Executable Files and Source Code to the Derivative Work. You may also aggregate with other (possibly commercial) programs as part of a larger (possibly commercial) software distribution.

e. The Articles discussing the Work published in any form by the author may not be distributed or republished without the Author’s consent. The Author reserves the right to withdraw this License and to require that You withdraw any such distribution of the Executable Files and Source Code pursuant to this License but you may not republish or otherwise distribute the contents of the Articles, without the prior written consent of the Author. Any subroutines or modules supplied by You and linked into the Source Code or Executable Files this Work shall not be considered part of this Work and will not be subject to the terms of this License.

7. Indemnity. You agree to defend, indemnify and hold harmless the Author and the Publisher from and against any claims, suits, losses, damages, liabilities, costs, and expenses (including reasonable legal or attorneys’ fees) resulting from or relating to any use of the Work by You.

8. Limitation on Liability. EXCEPT TO THE EXTENT REQUIRED BY APPLICABLE LAW, IN NO EVENT WILL THE AUTHOR BE LIABLE TO YOU ON ANY LEGAL THEORY FOR ANY SPECIAL, INCIDENTAL, CONSEQUENTIAL, PUNITIVE OR EXEMPLARY DAMAGES ARISING OUT OF THE USE OF THE WORK OR OTHERWISE. EVEN IF THE AUTHOR OR THE PUBLISHER HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

9. Termination. This License and the rights granted hereunder will terminate automatically upon any breach by You of any term of this License. Individuals or entities who have received Derivative Works from You under this License, however, will not have their licenses terminated provided such individuals or entities remain in full compliance with those licenses. Sections 1, 2, 6, 7, 8, 9, 10 and 11 will survive any termination of this License.

10. Publisher. The parties hereby confirm that the Publisher shall not, under any circumstances, be responsible for any harm, loss, or damage, including without limitation, any loss of data, arising from, caused by, or relating to any use of the Work.
whenever in connection with the Work and shall not be liable to You or any party on any legal theory for any damages whatsoever, including without limitation any general, special, incidental, consequential, indirect, or other damages, arising in connection to this license. The Publisher reserves the right to cease making the Work available to You at any time without notice.

11. Miscellaneous

a. This License shall be governed by the laws of the location of the head office of the Author or if the Author is a natural person, the laws of the principal place of residence of the Author.
b. If any provision of this License is invalid or unenforceable under applicable law, it shall not affect the validity or enforceability of the remainder of the terms of this License, and without further action by the parties to this Agreement, it shall be reformed to the minimum extent necessary to make such provision valid and enforceable.
c. No term or provision of this License shall be deemed waived and no breach consented to unless such waiver or consent shall be in writing and signed by the party to be charged with such waiver or consent.
d. This License constitutes an entire agreement between the parties with respect to the Work not specified herein. The Author shall not be bound by any additional provisions that may appear in any communication from You. This License may not be modified without the mutual written agreement of the Author and You.
